(1) Under special conditions, consult us.

(2) Software configurable up to ±18000°.

(3) Vertical outlet version: designed to offer additional connection protection at robot base or for use in clean and/or humid environment. Factory installation only.

(4) Pressurization kit: necessary for use in an environment with high dust levels or with substantial liquid splashing. This kit generates positive pressure in the arm. Factory installation only and required with pressurization kit.

(5) Version HE (Humid Environment): designed for use in humid and oxidizing environments. The arm components are painted individually, providing additional arm protection against oxidation and corrosion. Factory installation only and required with pressurization kit.

Product benefits

The TX200 robot series feature unique benefits to fit in all environments providing the best possible process quality and increased productivity.

WRIST

IP67 rating, high robustness, limited build-up on wrist.

VERTICAL CABLE OUTLET VERSION

Better cable protections, use in clean and/or humid environment.

FOREARM CONNECTIONS

Electrical and pneumatic connections close to the tool, user lines already installed.

RIGID STRUCTURE

High dynamic performance.

ENCLOSED STRUCTURE

Easy to clean and use in clean or hostile environments.

ENVIRONMENT

The robot is available in different versions: Cleanroom, Humid Environment (HE), Food and Life Science applications.

MULTIPLE ATTACHMENT METHODS

Adaptability and flexibility (floor, ceiling).

LARGE WORK ENVELOPE

The short robot base enables it to work, shelf mounted on an injection molding machine for example.

LIMITED RETENTION AREAS

Hygienic design with limited retention areas. Easy to clean for Food of Life Science applications.
